

Investments

Superannuation is generally a long term investment. Performance will vary from year to year. Your super will grow over the long term, but you may experience some years of low and even negative earnings. This is normal in an open market.

At WA Super we have the right mix of economies of scale, investment strategies and fund managers to help your investments grow while matching your appetite for risk.

For full details check out the Product Disclosure Statement and Member Guide available [here](#).
